

Crown's wood porch and lamp posts add a distinctive touch to any style home. Porch posts are often used as supporting elements for porches. Combined with balusters, hand and shoe rail, and decorative millwork, porch posts establish the popular Victorian style.

Crown's wood porch posts are constructed of select softwoods, laminated and finger-jointed for greater strength and stability. The wood porch posts are available in a variety of sizes and styles.

Cast aluminum plinths are an available option for providing proper ventilation at the bottom of the post. Elevating and ventilating the porch post provides protection from moisture absorption. Uplift kits are also available.

Porch Posts

LOAD BEARING COLONIAL WOOD
